

Pandemic Data

Players' Names:

Date of Play: ____ / ____ / _____ Round: __

The person whose turn is next should complete each row.

The role column is used to help keep track of turns (use role abbreviations below). The number of infections is the same as the number of cubes on the board at any one time. The notes portion should be used to record significant events: *outbreaks, epidemics, cures, and eradication (sunset)* events.

M = medic

D = dispatcher

Q = quarantine specialist

S = scientist

O = operations expert

C = contingency planner

R = researcher
